Experiment No: 1

1.Aim: Adding background image and creating hyperlinking in html.

2.Source code:

```html
<html>
<head><title>image</title>
</head>
 <body>
<style>
  body{
     background-image:url('https://www.wallpapertip.com/wmimgs/38-
388110_background-wallpaper-colorful-website-background-design.jpg');
     background-repeat: no-repeat;
     background-attachment: fixed;
     background-size:100% 100%;
   }
</style><pre>
<a href="#DSystem" style="color:rgb(230, 250, 10)"><h2><font size="15">batch
operating system</font></h2></a>
<a href="#BSystem" style="color:rgb(230, 250, 10)"><h2><font
size="15">Distributed Operating System</font></h2></a>
<a href="#CSystem" style="color:rgb(230, 250, 10)"><h2><font size="15">Network
Operating System</font></h2></a>
 <h2 id="DSystem" style="color:rgb(230, 250, 10)"></h2><font size="7"
color="black">
1. Batch Operating System
This type of operating system does not interact with the computer directly.
There is an operator which takes similar jobs having the same requirements
and groups them into batches. It is the responsibility of the operator to
sort jobs with similar needs. Batch Operating System is designed to manage
and execute a large number of jobs efficiently by processing them in groups.
Batch Operating SystemBatch Operating System Advantages of Batch Operating
SystemMultiple users can share the batch systems.The idle time for the batch
system is very less.It is easy to manage large work repeatedly in batch systems.
Disadvantages of Batch Operating SystemBatch systems are hard to debug.
 </font></pre></body></html>
```

3.Output:

batch operating system

Distributed Operating System

Network Operating System
